

Environmental Policy

Purpose

The Company is committed to minimise our environmental footprint. LNG is the most environmentally friendly fossil fuel, and we strive to transport and regas it with minimum negative environmental impact. We believe that LNG has an important role to play in a transition period to a carbon neutral and sustainable future.

Scope

This policy applies to all CoolCo employees.

Policy Statement

We shall:

- Endeavour to minimise our environmental footprint at each stage of our value chain from business development, project execution and through to operations.
- Minimise our emissions to air.
- Aim for zero spills.
- Understand all environmental aspects of our business.
- Measure and report our environmental impact.
- Review our environmental KPIs regularly.
- Set new and stricter environmental goals regularly.
- Always comply with environmental regulations.
- Strive to utilise available and proven technologies to reduce our environmental impact.
- Comply with the Hong Kong convention for recycling of vessels.
